

**Turn-key development and production infrastructures with Kubernetes on any cloud with complete CI/CD, Observability, and 24x7 support.**

# Most of the companies have terrible IT infrastructures:

- Created by someone, not documented and non-reproducible, nobody knows how to recreate it
- Developers are not able to deliver new features fast
- Downtimes and incidents happen too often

# SHALB DevOps PLATFORM solves these problems:

- Turn-key development and production infrastructure described as a code
- Kubernetes based environments - fail-safe and scalable Complete CI/CD process with the focus on microservice architecture
- Dashboards, centralized logging, Prometheus monitoring, performance metrics and alerting
- Run in AWS, GoogleCloud, Azure or on-premises and Bare Metal

# SHALB DevOps PLATFORM embodies our experience

- More than 11 years providing DevOps services
- Over 100 different infrastructures created
- More than 50 infrastructures are being supported right now with 100% annual contract renewal
- Expertise in Java/Spring, NodeJS, PHP, Python, Ruby projects
- Managing large MySQL, PostgreSQL, MongoDB databases with the complex replication schemes

# We make money on Support

- Price for support starts from \$36000 per customer per year
- Implementation of new features billed on an hourly basis
- Core product is Open Source - free to download and use

# Future growth

- A variety of IT projects and startups emerge every day
- A large amount of companies trying to adopt Kubernetes and CNCF stack
- Market of DevOps and Cloud offering is now ~20 bln and growing
- Now we have an ability to on-board 10 new customers per month, we plan to make 100
- The PLATFORM enables us to create and manage many infrastructures with a small team of engineers or completely without local staff
